

# MARTON ERSEK

## Full Stack Developer

Budapest, Hungary • [info@warmardev.com](mailto:info@warmardev.com) • [warmardev.com](http://warmardev.com) • [linkedin.com/in/marton-ersek](https://linkedin.com/in/marton-ersek) • [github.com/warmar94](https://github.com/warmar94)

---

### SUMMARY

Full-stack developer specializing in cryptocurrency, fintech, and data-driven web platforms. Pivoted into software engineering after the 2021 crypto bull market and, by harnessing AI-enhanced workflows, has since shipped an extensive portfolio of production applications across web, iOS, and Android in a fraction of the usual time. Deep expertise in PHP/Laravel, with hands-on experience across mobile development, JavaScript tooling, and data visualization.

### TECHNICAL SKILLS

|                 |                                                                                 |
|-----------------|---------------------------------------------------------------------------------|
| <b>Backend</b>  | PHP, Laravel, Livewire, MySQL                                                   |
| <b>Frontend</b> | HTML, CSS, JavaScript, TypeScript, TailwindCSS, Bootstrap                       |
| <b>Mobile</b>   | Flutter (Dart) — iOS & Android                                                  |
| <b>Other</b>    | Python, C++ (Unreal Engine), database design & optimization, data visualization |

### EXPERIENCE

#### Full Stack Developer — MillionMiner

2022 – Present

- Design and maintain a fully custom Laravel e-commerce platform ([millionminer.com](http://millionminer.com)) for a global ASIC miner webshop & hosting company, built for scalability, performance, and maintainability.
- Independently built and own MinerCompare.com, a top 4 crypto mining profitability calculator, shipped as web, iOS, and Android apps with real-time market data and analytics.
- Delivered production platforms across the crypto/fintech space, including LicensePlate.ae (UAE luxury license plate marketplace) and DeepCore Hosting (ASIC miner hosting dashboard), each shipped as web plus native iOS/Android apps.
- Wrote and open-sourced Laravel packages, including Laravel AI Translate (AI-powered translations with automatic missing key detection) and Laravel Blog (full blog system for Laravel), plus ChartForge.js (lightweight JavaScript charting library).

#### Community Support & Marketing — Bobcat Miner

2021 – 2022

- Supported community engagement and marketing initiatives for Bobcat Miner, a Helium (cryptocurrency) mining hardware manufacturer — first hands-on exposure to the crypto mining industry, which shaped the later pivot into software engineering.

### SELECTED PROJECTS

- **MinerCompare** — Crypto mining profit calculator — Web, iOS & Android ([minercompare.com](http://minercompare.com))
- **LicensePlate.ae** — Luxury license plate marketplace — Web, iOS & Android ([licenseplate.ae](http://licenseplate.ae))
- **DeepCore Hosting** — ASIC miner hosting dashboard — Web, iOS & Android ([dash.deepcorehosting.com](http://dash.deepcorehosting.com))
- **MillionMiner** — Custom Laravel e-commerce platform ([millionminer.com](http://millionminer.com))
- **ChartForge.js** — Lightweight JavaScript charting library ([chartforgejs.com](http://chartforgejs.com))
- **Laravel AI Translate** — Open-source Laravel package for AI-powered translations with automatic missing key detection ([github.com/warmar94/laravel-ai-translate](https://github.com/warmar94/laravel-ai-translate))
- **Laravel Blog** — Open-source Laravel package for adding a full blog system to any Laravel app ([github.com/warmar94/laravel-blog](https://github.com/warmar94/laravel-blog))
